

Mitchell Technical Institute Articulation

Articulation is a cooperative effort between South Dakota's high schools, the Department of Education's Office of Career and Technical Education (OCTE), and technical institutes. It links high schools with certificate, diploma, and associate degree programs and provides students with an opportunity to receive credit for skills previously learned. The courses listed below in the Transportation, Distribution & Logistics career cluster are currently articulated from OCTE approved programs to the Outdoor Power and Recreational Vehicle Technology program at Mitchell Technical Institute.

Articulation Guidelines

1. To receive articulated credit, the student must have completed the high school course within the last three years.
2. A minimum of a "B" in the course(s) to be articulated is required.
3. Tuition is not charged for the articulated credit(s).
4. Articulated courses will be honored by all post-secondary institutes for those course(s) that have common course names and numbers.
5. If the curriculum of the technical institute course changes, the terms of the agreement may also change.
6. All articulation agreements between secondary schools and the technical institutes reflect only the transfer ability of credit between these agencies and not with state universities.

Transportation, Distribution & Logistics

High School Information Technology Cluster Courses

MTI Outdoor Power and Recreational Vehicle Technology Courses

At this point in time, no Transportation, Distribution and Logistics cluster courses articulate to Outdoor Power and Recreational Vehicle Technology.
